Animal Food Manufacturing

Product Summary:

Onyx Data - FabOps™ Intelligence

“ We were looking for a single, unified tool to manage governance, cost, and performance in Microsoft Fabric. FabOps™ stood out as a one-stop-shop solution.”

Nico Botes
Data Team Manager, Montego

Overview

Montego is a global leader in pet health and wellness, offering premium treats made with A-grade ingredients and sustainable practices. Montego required a single, unified tool that could provide comprehensive visibility into governance, cost management, and performance monitoring within Microsoft Fabric.

FabOps™ was implemented as a one-stop-shop solution to simplify and centralize operational oversight. Being a small, centralized data team, they required a unified monitoring, governance and administration tool for their Fabric Capacity as capacity planning is critical for central visibility.

FabOps™
INTELLIGENCE

**ONYX
DATA**

“ The UI is intuitive, performance is snappy, and admin controls are well thought-out.”

Nico Botes
Data Team Manager, Montego

Solution

FabOps™, developed by Onyx Data and now available on Azure Marketplace, delivers a unified, AI-powered platform that helps Fabric admins regain control—turning chaos into clarity in minutes, not months.

FabOps™ acts as a control tower for Microsoft Fabric, offering real-time governance scoring, performance monitoring, and cost optimization. With AI-driven recommendations and Copilot-powered insights, it simplifies oversight and empowers data teams to make faster, smarter decisions.

Key Components of the Solution

- **Governance Scoring:** AI-powered assessment with actionable recommendations
- **Copilot for Fabric:** Natural language queries for performance and cost insights
- **Model Optimization:** Automated tuning of underperforming models and refresh patterns
- **Refresh Analysis:** Deep visibility into data refresh failures and bottlenecks
- **User Access Governance:** Permission monitoring across the Fabric estate
- **Cost Optimization:** Real-time analysis of resource spend and savings opportunities

“Alerts on outages and scoring functionality helped us make faster decisions and hit our KPIs. I’d recommend FabOps™ to any Fabric user—it’s lightweight, centralized, and packed with tools that simplify oversight.”

Nico Botes
Data Team Manager, Montego

At a Glance Implementation

FabOps™ was rapidly deployed and delivered immediate value, delivering actionable insights in under 60 minutes. With no setup fees and full Azure verification,

FabOps™ ensured Montego’s implementation had seamless integration and enterprise-grade reliability.

Impact

- Faster decision making with alerts on Fabric Outages via e-mail notifications
- Effective KPI management of Data teams with scoring functionality
- Up to 63% governance efficiency improvement
- 99.9% refresh reliability
- 24/7 continuous monitoring and score tracking
